

ENVIRONMENTAL POLICY 2018

Mark Davison (Orbitvisual) is an environmentally conscious and responsible company. We are therefore committed to reducing our environmental impact in a sustainable manner.

To carry out this commitment and working within my company and with clients, we strive to ensure that all aspects of the business have the least harmful effect on the environment by:

- Reducing waste through re-use and recycling of paper and other materials**
- Being aware of all environmental legislation and ensuring that regulatory requirements are met and, if possible, improved upon**
- Encourage similar environmental standards from our suppliers and contractors**
- Minimise energy and water usage, vehicle usage and consumption of natural resources, especially where they are non- renewable**
- Assessing the environmental impact of any new working method or products that we intend to introduce**
- Purchasing recycled, recyclable or re-furbished products and materials where these alternatives are available, suitable and economical**
- Operating and maintaining vehicles used for business purposes with regard to environmental issues as far as reasonably practical and trying to reduce travel or using alternative means of transport where appropriate**
